## PROMOTING GREEN LIVING AREAS

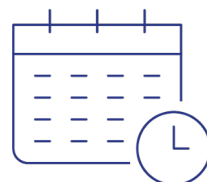

## RE-ACT SCHOOLS

### OUR PROJECT

The escalating effects of **climate change** pose significant threats to cities, impacting the urban environment, life quality, and health in the Mediterranean. The **RE-ACT Schools project** addresses these challenges by focusing on **climate change adaptation** and **risk prevention in school outdoor spaces**. Schoolyards, especially in cities with limited public green living areas, are valuable assets that offer opportunities to test and promote **Nature-based Solutions** for **climate change mitigation**. The project brings together a diverse partnership from **six Mediterranean countries** (Italy, Spain, France, Croatia, Bulgaria, and Cyprus) to transform six schoolyards into green, climate-resilient spaces that promote healthy lifestyles.

**Total budget**  
€ 2.488.190,00

**Project duration**  
33 months

**Interreg Funds**  
€ 1.990.552,00

### PROJECT PARTNERS

University of Florence, Architecture Department (Italy) · Lucca Province (Italy) · Mataró Municipality (Spain) · Var Department (France) · Split Municipality (Croatia) · Varna Economic Development Agency (Bulgaria) · The Cyprus Institute (Cyprus) · Nicosia School Board (Cyprus)
